Additional Comments

It was a pleasure to work with Hung and Coleman, their IT guys. They took us where we need to be, to complete the work. We found 95 percent(5 percent cables were not used or cut out) of all cables in all 5 areas where client was unsure what was what. Everything got document on a floor plan that we will provide with all yhe details of each cable. We will have suggestions for future work because a lot of the data or voice jacks are either damaged or not working. Hope to work with them again soon. I signed off because Hung had to leave back to the embassy before we completed the work.

Additional Comments

Client was not on site for sign off of half of the job done on new cable system. Demo and closet clean up it's complete. Also old data cables at old locations got removed as well. Need to go back to drop cables, cut outlets for new locations, terminate, test and label data cables. But construction needs to move further ahead for us to go back. Also waiting fiber to get deliver to install fiber from MDF to new IDF.

Additional Comments	Labeled all cables that were connected to certain devices before unplugging anything. Removed any cables or devices that were not being used. Installed a 6U wall mount rack with 2 shelves to neatly and organize devices on shelves. Plugged all cables to its original spots, put velcro on data cables and power cables when they were long. Made sure all systems were working again, and if the internet came back on. All computers, WAPs, and sound system went back on without any issues.

We will be showing up with this 13' rat next week. And we will stand by it on public property. The police will not be able to stop us.

Regards,
Stu
